## PROJECTS

---

### Portfolio Website

<https://coalemus.github.io/Portfolio-Website/>

*HTML, CSS, Javascript, Git*

- Personal Portfolio for demonstration of practical skill in coding using HTML, CSS, and Javascript.
- Made the website responsive to all screen resolutions.
- 100 score on <https://web.dev/measure/>.
- Hosted using Apache server and Github pages.

### Online Class Automation

<https://github.com/Coalemus/Python-Projects>

*Python, Tkinter, Selenium, Unix Shell, Powershell Scripting, Git*

- Selenium script to schedule automatically joining Google Meet calls.
- Scheduled tasks using Batch and Unix Shell scripting.
- List of incoming features include;
  - GUI for setting meeting links and time (Work in progress),
  - Cross platform capability (Linux is Work in progress).

### Linux Integration

<https://github.com/Coalemus/Terminal-Projects>

*Arch Linux*

- Switched main operating system to Arch Linux, demonstrating capability of using the Unix Shell.
- Practiced with Arch Linux and Wayland to have an educational troubleshooting experience.
- Designing using the config files provided UI/UX experience.

### Python Discord bot

<https://github.com/Coalemus/Python-Discord-bot>

*Python, discord.py API, Unix Shell, Git*

- Practice Discord.py bot for Personal Discord Server.
- List of features include;
  - Administration, Music playing, custom greetings based on messages.
- Automated startup and update process by using Batch and Unix Shell scripting.

### Python Calculator

<https://github.com/Coalemus/Python-Projects>

*Python, Tkinter, Unix Shell, Git*

- Calculator GUI with basic arithmetic features.
- Added aliases in my Unix shell to easily open the calculator using the command line.
  - Command line version of the calculator is also made.
